# WYANT ROSES *produce satisfaction*

WYANT ROSES are all three-year, field-grown budded bushes of the highest quality. Having been raised in the severe climate of Northern Ohio by Rose Specialists, they will produce satisfaction in your garden if given a chance.

## FALL-PLANTED ROSES ARE BEST

Leading rosarians agree that fall is the ideal time to plant Roses. Fall planting results in earlier and larger blooms and more of them. Our Roses are dug when the season's growth has been completed and they are shipped to you at the proper time—October or November. At this time the soil is usually more mellow and easier to work. You can prepare it when convenient and have it ready when plants arrive. Poor soil can be greatly improved by adding up to  $\frac{1}{3}$  peat or humus. Roses like good soil.

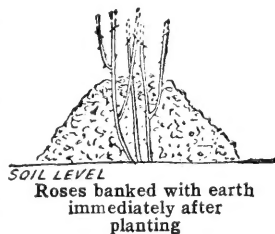

## PLANTING INSTRUCTIONS

Keep the roots moist all the time before planting.

Spread out the roots so they do not crowd; cover them with good soil and firm the earth about them, eliminating all air pockets.

Plant 15 to 18 inches apart, where there is sunshine at least half a day.

Mound soil about 10 inches high immediately after planting, to keep the moisture in the branches.

## PLANT PROTECTORS

Instead of mounding your Roses, use Wyant Plant Protectors for much safer, quicker and easier planting or winter protection. Made of stiff, waterproof paper about 30 inches long and 10 inches high, they are set around the plant as soon as it is in the ground. Twine is put around the Protector to hold it in place, so that it looks like a collar or stove pipe around the plant. This collar is then filled with soil. It takes a relatively small amount of soil and holds it around the branches until spring. 75c per doz. (\$1.00 per doz., postpaid).
